SAMSON PHILIPO MAMUYA

FRONTEND WEB DEVELOPER

PERSONAL STATEMENT

Motivated first-year Computer Science student and self-taught frontend developer with hands-on experience building modern web applications using React, Next.js, Tailwind CSS and Framer Motion. Has independently designed and built several full front-end projects, including a multi-language travel booking platform and a hotel booking site, using Git/GitHub for version control and Docker for containerisation. Seeking an entry-level frontend developer or internship role to apply these skills on real-world products while continuing to grow as a software engineer.

PROJECTS

SafariVoyage Africa

[github.com/Samson-64/safarivoyage-africa](#)
— React single-page travel platform for browsing African destinations and guided tours, with a full client-side booking flow, search & filtering, six-language localisation and multi-currency pricing.

Sun N Sun Beach Hotel

[github.com/Samson-64/SunNSun](#)
— Marketing and booking website for a beachfront hotel, built with an HTML/CSS front end and an early-stage Node.js REST API back end.

Bean-There Coffee Shop

[github.com/Samson-64/Bean-There](#)
— Responsive coffee shop landing page built with React and TypeScript.

Multiplayer Task Board

[github.com/Samson-64/multiplayer-task-board](#)
— Collaborative task board web app built with React and TypeScript.

Personal Portfolio

[github.com/Samson-64/MyPortfolio](#)
— Personal portfolio site presenting services, project case studies and background, built with React 19, TypeScript and Vite with scroll-triggered animations.
